

Make Screen Time, Homework & Chores Easier ...and Give Your Kids Better Habits for Life!

Imagine... your family is free of screen time battles, homework hassles, and chore wars. Distracted children are now motivated. Daily routines are established. Family life is fun again.

Habyts is the family habit-building app that:

- ✓ Regulates screen time
- ✓ Eliminates homework distractions
- ✓ Motivates your kids without nagging

Here at Habyts, we help busy families find the right balance to make good use of computer technologies for education, entertainment and more. We're happy for our kids to use screens **within limits** – including, of course, for homework – but we also expect them to do their chores to earn their recreation privileges. We built Habyts to help families around the world build these good habits for life.

Habyts works across your kids' different devices (Android, Windows PCs, iPhones and iPads) to:

- enforce sensible **time limits & schedules** – so 'time adds up' across devices.
- block out **homework distractions** – so kids can use Wikipedia and Microsoft Word for homework, but not social media or games apps. Time spent studying counts separately from play time!
- **incentivise tasks** with extra play time – so your child can earn 10 extra minutes screen time for putting the recycling out on a Tuesday.
- allow other, **non-screen time rewards** to encourage responsibility.
- **filter harmful websites** to protect your kids.
- require some **tasks to be done before screen time**. Perhaps your house rules are that homework must be done or the dog fed before playtime – these rules can be set flexibly.
- **report** on what they're doing on their devices – both online and offline.
- allow **shared devices** – so if your kids all use the family PC, when they sign in to Habyts their individual settings will apply.
- let parents **stay in control** – by app or browser – wherever you are.

Study Time Increased and Social Media Decreased

"I like knowing what my kids are doing on the computer without checking on them very often... I can monitor how long they do certain things on the computer. Study Time increased and social media decreased...I loved it!"

- Nicole D

Habyts works even when you're not there – and also when the kids aren't at home (Habyts covers 3G/4G and any other network). You can also add other adults to your account, so that control can be shared with nannies or childminders.
